WARNING: Indicates a potentially hazardous situation which, if not avoided, **could** result in **death or serious injury**.

CAUTION: Indicates a potentially hazardous situation which, if not avoided, **may** result in **minor or moderate injury**.

NOTICE: Indicates a practice **not related to personal injury** which, if not avoided, **may** result in **property damage**.

Denotes risk of electric shock.

Denotes risk of fire.

WARNING: To reduce the risk of injury, read the instruction manual.

General Power Tool Safety Warnings

WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

SAVE ALL WARNINGS AND INSTRUCTIONS FOR FUTURE REFERENCE

The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1) WORK AREA SAFETY

- Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
- Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.
- Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

2) ELECTRICAL SAFETY

- Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools.** Unmodified plugs and matching outlets will reduce risk of electric shock.
- Avoid body contact with earthed or grounded surfaces such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
- Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.
- Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts.** Damaged or entangled cords increase the risk of electric shock.
- When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
- If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

3) PERSONAL SAFETY

- Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication.** A moment of inattention while operating power tools may result in serious personal injury.
- Use personal protective equipment. Always wear eye protection.** Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- Prevent unintentional starting. Ensure the switch is in the off position before connecting to power source and/or battery pack, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.

- e) **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.
- f) **Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.
- g) **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.

4) POWER TOOL USE AND CARE

- a) **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.
- b) **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- c) **Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
- d) **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.
- e) **Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.
- f) **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- g) **Use the power tool, accessories and tool bits etc., in accordance with these instructions taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

5) BATTERY TOOL USE AND CARE

- a) **Recharge only with the charger specified by the manufacturer.** A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.
- b) **Use power tools only with specifically designated battery packs.** Use of any other battery packs may create a risk of injury and fire.
- c) **When battery pack is not in use, keep it away from other metal objects like paper clips, coins, keys, nails, screws or other small metal objects that can make a connection from one terminal to another.** Shorting the battery terminals together may cause burns or a fire.
- d) **Under abusive conditions, liquid may be ejected from the battery, avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help.** Liquid ejected from the battery may cause irritation or burns.

6) SERVICE

- a) **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

Additional Specific Safety Rules for Drill/Driver/Hammerdrill

- **Wear ear protectors when impact drilling.** Exposure to noise can cause hearing loss.
- **Use auxiliary handle(s), if supplied with the tool.** Loss of control can cause personal injury.
- **Hold power tool by insulated gripping surfaces, when performing an operation where the cutting accessory may contact hidden wiring.** Cutting accessory contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.
- **Use clamps or other practical way to secure and support the workpiece to a stable platform.** Holding the work by hand or against your body is unstable and may lead to loss of control.
- **Wear safety goggles or other eye protection.** Hammering and drilling operations cause chips to fly. Flying particles can cause permanent eye damage.

- **Accessories and tool may get hot during operation.** Wear gloves when handling them if performing heat producing applications such as hammerdrilling and drilling metals.
- **Do not operate this tool for long periods of time.** Vibration caused by hammer action may be harmful to your hands and arms. Use gloves to provide extra cushion and limit exposure by taking frequent rest periods.
- **Air vents often cover moving parts and should be avoided.** Loose clothes, jewelry or long hair can be caught in moving parts.

Residual Risks

The following risks are inherent to the use of drills:

- Injuries caused by touching the rotating parts or hot parts of the tool.

In spite of the application of the relevant safety regulations and the implementation of safety devices, certain residual risks cannot be avoided. These are:

- Impairment of hearing.
- Risk of squeezing fingers when changing accessories.
- Health hazards caused by breathing dust developed when working in wood.
- Risk of personal injury due to flying particles.
- Risk of personal injury due to prolonged use.

Important Safety Instructions for All Battery Chargers

SAVE THESE INSTRUCTIONS: This manual contains important safety and operating instructions for the DCB107 battery chargers.

- Before using the charger, read all instructions and cautionary markings on charger, battery pack and product using the battery pack.

WARNING: Shock hazard. Do not allow any liquid to get inside charger. Electric shock may result.

CAUTION: Burn hazard. To reduce the risk of injury, charge only DeWALT rechargeable battery packs. Other types of batteries may overheat and burst resulting in personal injury and property damage.

CAUTION: Children should be supervised to ensure that they do not play with the appliance.

NOTICE: Under certain conditions, with the charger plugged in to the power supply, the exposed charging contacts inside the charger can be shorted by foreign material. Foreign materials of a conductive nature such as, but not limited to, steel wool, aluminum foil or any buildup of metallic particles should be kept away from charger cavities. Always unplug the charger from the power supply when there is no battery pack in the cavity. Unplug charger before attempting to clean.

- **DO NOT attempt to charge the battery pack with any chargers other than the ones in this manual.** The charger and battery pack are specifically designed to work together.
- **These chargers are not intended for any uses other than charging DEWALT rechargeable batteries.** Any other uses may result in risk of fire, electric shock or electrocution.
- **Do not expose charger to rain or snow.**
- **Pull by plug rather than cord when disconnecting charger.** This will reduce risk of damage to electric plug and cord.
- **Make sure that cord is located so that it will not be stepped on, tripped over or otherwise subjected to damage or stress.**
- **Do not use an extension cord unless it is absolutely necessary.** Use of improper extension cord could result in risk of fire, electric shock or electrocution.
- **When operating a charger outdoors, always provide a dry location and use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.

- **Do not block the ventilation slots on the charger. The ventilation slots are located on the top and sides of the charger.** Place the charger in a position away from any heat source.
- **Do not operate charger with damaged cord or plug** — have them replaced immediately.
- **Do not operate charger if it has received a sharp blow, been dropped or otherwise damaged in any way.** Take it to an authorised service centre.
- **Do not disassemble the charger; take it to an authorised service centre when service or repair is required.** Incorrect reassembly may result in a risk of electric shock, electrocution or fire.
- In case of damaged power supply cord the supply cord must be replaced immediately by the manufacturer, its service agent or similar qualified person to prevent any hazard.
- **Disconnect the charger from the outlet before attempting any cleaning. This will reduce the risk of electric shock.** Removing the battery pack will not reduce this risk.
- **NEVER attempt to connect 2 chargers together.**
- **The charger is designed to operate on standard 220-240 V household electrical power. Do not attempt to use it on any other voltage.** This does not apply to the vehicular charger.

SAVE THESE INSTRUCTIONS

Chargers

The charger accepts 10.8V (12V Max), 18V (20V Max) Li-Ion (DCB181, DCB182, DCB183, DCB184, DCB203, DCB204, DCB205, DCB185, DCB186, DCB187, DCB189, DCB240, DCBP034) battery packs.

This charger requires no adjustment and is designed to be as easy as possible to operate.

Charging Procedure (fig. 2)

1. Plug the charger into an appropriate 220-240V outlet before inserting the battery pack.
2. Insert the battery pack (g) into the charger, making sure the pack is fully seated in the charger. The red (charging) light will blink continuously indicating that the charging process has started.
3. The completion of charge will be indicated by the red light remaining ON continuously. The pack is fully charged and may be used at this time or left in the charger.

NOTE: To ensure maximum performance and life of Li-Ion batteries, charge the battery pack fully before first use.

Charging Process

Refer to the table below for the state of charge of the battery pack.

State of charge	
	charging
	fully charged
	hot/cold pack delay

HOT/COLD PACK DELAY

The charger has a hot/cold delay feature. When the charger detects a battery that is hot, it automatically delays charging until the battery has cooled.

When the charger detects a battery that is cold, it automatically delays charging until the battery has warmed.

The red light will continue to blink, but a yellow indicator light will be illuminated during this operation. Once the battery has cooled, the yellow light will turn off and the charger will resume the charging procedure.

XR Li-Ion tools are designed with an Electronic Protection System that will protect the battery against overloading, overheating or deep discharge.

The tool will automatically turn off if the Electronic Protection System engages. If this occurs, place the Li-Ion battery on the charger until it is fully charged.

Important Safety Instructions for All Battery Packs

When ordering replacement battery packs, be sure to include the catalog number and voltage.

The battery pack is not fully charged out of the carton. Before using the battery pack and charger, read the safety instructions below and then follow the charging procedures outlined.

READ ALL INSTRUCTIONS

- **Do not charge or use the battery pack in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Inserting or removing the battery pack from the charger may ignite the dust or fumes.
- **Never force the battery pack into charger. Do not modify the battery pack in any way to fit into a non-compatible charger as battery pack may rupture causing serious personal injury.**
- *Charge the battery packs only in designated*

DeWALT chargers.

- **DO NOT** splash or immerse in water or other liquids.
- **Do not store or use the tool and battery pack in locations where the temperature may reach or exceed 40 °C (105 °F) (such as outside sheds or metal buildings in summer).**
- For best results, make sure the battery pack is fully charged before use.

WARNING: Never attempt to open the battery pack for any reason. If the battery pack case is cracked or damaged, do not insert it into the charger. Do not crush, drop or damage battery pack. Do not use a battery pack or charger that has received a sharp blow, been dropped, run over or damaged in any way (e.g., pierced with a nail, hit with a hammer, stepped on). Electric shock or electrocution may result. Damaged battery packs should be returned to the service centre for recycling.

CAUTION: When not in use, place tool on its side on a stable surface where it will not cause a tripping or falling hazard. Some tools with large battery packs will stand upright on the battery pack but may be easily knocked over.

SPECIFIC SAFETY INSTRUCTIONS FOR LITHIUM ION (Li-Ion)

- **Do not incinerate the battery pack even if it is severely damaged or is completely worn out.** The battery pack can explode in a fire. Toxic fumes and materials are created when lithium ion battery packs are burned.
- **If battery contents come into contact with the skin, immediately wash the area with mild soap and water.** If the battery liquid gets into the eye, rinse water over the open eye for 15 minutes or until irritation ceases. If medical attention is needed, the battery electrolyte is composed of a mixture of liquid organic carbonates and lithium salts.
- **Contents of opened battery cells may cause respiratory irritation.** Provide fresh air. If symptoms persists, seek medical attention.

WARNING: Burn hazard. Battery liquid may be flammable if exposed to spark or flame.

INTENDED USE

These drills/drivers/hammerdrills are designed for professional drilling, percussion drilling and screwdriving applications.

DO NOT use under wet conditions or in presence of flammable liquids or gases.

These drills/drivers/hammerdrills are professional power tools.

DO NOT let children come into contact with the tool. Supervision is required when inexperienced operators use this tool.

- This product is not intended for use by persons (including children) suffering from diminished physical, sensory or mental abilities; lack of experience, knowledge or skills unless they are supervised by a person responsible for their safety. Children should never be left alone with this product.

Electrical Safety

The electric motor has been designed for one voltage only. Always check that the battery pack voltage corresponds to the voltage on the rating plate. Also make sure that the voltage of your charger corresponds to that of your mains.

Your DEWALT charger is double insulated in accordance with IEC 60335; therefore no earth wire is required.

If the supply cord is damaged, it must be replaced by a specially prepared cord available through the DEWALT service organisation.

Using an Extension Cable

An extension cord should not be used unless absolutely necessary. Use an approved extension cable suitable for the power input of your charger (see **Technical Data**). The minimum conductor size is 1 mm²; the maximum length is 30 m.

When using a cable reel, always unwind the cable completely.

ASSEMBLY AND ADJUSTMENTS

WARNING: To reduce the risk of serious personal injury, turn tool off and disconnect battery pack before making any adjustments or removing/installing attachments or accessories. An accidental start-up can cause injury.

WARNING: Use only DEWALT battery packs and chargers.

Inserting and Removing the Battery Pack from the Tool (fig. 2)

WARNING: Prior to assembly and adjustment, always remove the battery pack. Always switch off the tool before inserting or removing the battery pack.

NOTE: For best results, make sure your battery pack is fully charged.

TO INSTALL THE BATTERY PACK INTO THE TOOL HANDLE

1. Align the battery pack (g) with the rails inside the tool's handle (fig. 2).
2. Slide it into the handle until the battery pack is firmly seated in the tool and ensure that it does not disengage.

TO REMOVE THE BATTERY PACK FROM THE TOOL

1. Press the battery release button (h) and firmly pull the battery pack out of the tool handle.
2. Insert battery pack into the charger as described in the charger section of this manual.

FUEL GAUGE BATTERY PACKS (FIG. 2)

Some DEWALT battery packs include a fuel gauge which consists of three green LED lights that indicate the level of charge remaining in the battery pack.

To actuate the fuel gauge, press and hold the fuel gauge button (k). A combination of the three green LED lights will illuminate designating the level of charge left. When the level of charge in the battery is below the usable limit, the fuel gauge will not illuminate and the battery will need to be recharged.

NOTE: The fuel gauge is only an indication of the charge left on the battery pack. It does not indicate tool functionality and is subject to variation based on product components, temperature and end-user application.

Variable Speed Trigger Switch (fig. 1)

To turn the tool on, squeeze the trigger switch (a). To turn the tool off, release the trigger switch. Your tool is equipped with a brake. The chuck will stop as soon as the trigger switch is fully released.

NOTE: Continuous use in variable speed range is not recommended. It may damage the switch and should be avoided.

Forward/Reverse Control Button (fig. 1)

A forward/reverse control button (b) determines the direction of the tool and also serves as a lock-off button.

To select forward rotation, release the trigger switch and depress the forward/reverse control button on the right side of the tool.

To select reverse, depress the forward/reverse control button on the left side of the tool.

The center position of the control button locks the tool in the off position. When changing the position of the control button, be sure the trigger is released.

NOTE: The first time the tool is run after changing the direction of rotation, you may hear a click on start up. This is normal and does not indicate a problem.

Torque Adjustment Collar (fig. 1)

Your tool has an adjustable torque screwdriver mechanism for driving and removing a wide array of fastener shapes and sizes and in some models, a hammer mechanism for drilling into masonry. Circling the collar (c) are numbers, a drill bit symbol, and on some models, a hammer symbol. These numbers are used to set the clutch to deliver a torque range. The higher the number on the collar, the higher the torque and the larger the fastener which can be driven. To select any of the numbers, rotate until the desired number aligns with the arrow.

Dual Range Gearing (fig. 1)

The dual range feature of your drill/driver/hammerdrill allows you to shift gears for greater versatility.

1. To select speed 1 (high torque setting), turn the tool off and permit it to stop. Slide the gear shifter (d) forward (towards the chuck).
2. To select speed 2 (low torque setting), turn the tool off and permit it to stop. Slide the gear shifter back (away from the chuck).

NOTE: Do not change gears when the tool is running. Always allow the drill to come to a complete stop before changing gears. If you are having trouble changing gears, make sure that the dual range gear shifter is either completely pushed forward or completely pushed back.

Worklight (fig. 1)

There is a worklight (e) located just above the trigger switch (a). The worklight is activated when the trigger switch is depressed. When the trigger is released, the worklight will stay illuminated for up to 20 seconds.

NOTE: The worklight is for lighting the immediate work surface and is not intended to be used as a flashlight.

Keyless Single Sleeve Chuck (fig. 7–9)

WARNING: Do not attempt to tighten drill bits (or any other accessory) by gripping the front part of the chuck and turning the tool on. Damage to the chuck and personal injury may result. Always lock off trigger switch and disconnect tool from power source when changing accessories.

WARNING: Always ensure the bit is secure before starting the tool. A loose bit may eject from tool causing possible personal injury.

Your tool features a keyless chuck (f) with one rotating sleeve for one-handed operation of the chuck. To insert a drill bit or other accessory, follow these steps.

1. Turn tool off and disconnect tool from power source.
2. Grasp the black sleeve of the chuck with one hand and use the other hand to secure the tool. Rotate the sleeve counterclockwise far enough to accept the desired accessory.
3. Insert the accessory about 19 mm (3/4") into the chuck and tighten securely by rotating the chuck sleeve clockwise with one hand while holding the tool with the other. Your tool is equipped with an automatic spindle lock mechanism. This allows you to open and close the chuck with one hand.

Be sure to tighten chuck with one hand on the chuck sleeve and one hand holding the tool for maximum tightness.

To release the accessory, repeat steps 1 and 2 above.

OPERATION

Instructions for Use

WARNING: Always observe the safety instructions and applicable regulations.

WARNING: To reduce the risk of serious personal injury, turn tool off and disconnect battery pack before making any adjustments or removing/installing attachments or accessories. An accidental start-up can cause injury.

Proper Hand Position (fig. 3)

WARNING: To reduce the risk of serious personal injury, **ALWAYS** use proper hand position as shown.

WARNING: To reduce the risk of serious personal injury, **ALWAYS** hold securely in anticipation of a sudden reaction.

Proper hand position requires one hand on the top of the drill as shown, with the other hand on the main handle (i).

Screwdriver Operation (fig. 4)

1. Select the desired speed/torque range using the dual range gear selector to match the speed and torque of the planned operation.
2. Turn the torque adjustment collar (c) to the desired position. Lower numbers indicate lower torque settings; higher numbers indicate higher torque settings.
3. Insert the desired fastener accessory into the chuck as you would any drill bit.
4. Make some practice runs in scrap or on unseen areas to determine the proper position of the clutch collar.
5. Always start with lower torque settings, then advance to higher torque settings to avoid damage to the workpiece or fastener.

Drill Operation (fig. 5)

WARNING: To reduce the risk of serious personal injury, turn tool off and disconnect tool from power source before making any adjustments or removing/installing attachments or accessories.

WARNING: To reduce the risk of personal injury, **ALWAYS** ensure workpiece is anchored or clamped firmly. If drilling thin material, use a wood "back-up" block to prevent damage to the material.

1. Turn the collar (c) to the drill symbol.
2. Select the desired speed/torque range using the gear shifter to match the speed and torque to the planned operation.
3. For WOOD, use twist bits, spade bits, power auger bits or hole saws. For METAL, use high-speed steel twist drill bits or hole saws. Use a cutting lubricant when drilling metals. The exceptions are cast iron and brass which should be drilled dry.
4. Always apply pressure in a straight line with the bit. Use enough pressure to keep drill biting, but do not push hard enough to stall the motor or deflect the bit.
5. Hold tool firmly with both hands to control the twisting action of the drill. If model is not equipped with side handle, grip drill with one hand on the handle and one hand on the battery pack.

CAUTION: *Drill may stall if overloaded causing a sudden twist. Always expect the stall. Grip the drill firmly to control the twisting action and avoid injury.*

6. **IF DRILL STALLS**, it is usually because it is being overloaded or improperly used. **RELEASE TRIGGER IMMEDIATELY**, remove drill bit from work, and determine cause of stalling. **DO NOT CLICK TRIGGER ON AND OFF IN AN ATTEMPT TO START A STALLED DRILL – THIS CAN DAMAGE THE DRILL.**
7. To minimize stalling or breaking through the material, reduce pressure on drill and ease the bit through the last fractional part of the hole.
8. Keep the motor running when pulling the bit back out of a drilled hole. This will help prevent jamming.
9. With variable speed drills there is no need to center punch the point to be drilled. Use a slow speed to start the hole and accelerate by squeezing the trigger harder when the hole is deep enough to drill without the bit skipping out.

Hammerdrill Operation (fig. 6)

DCD776

1. Turn the collar (c) to the hammerdrill symbol.
2. Select the high speed setting by sliding the selector back (away from the chuck).

IMPORTANT: Use carbide-tipped or masonry bits only.

3. Drill with just enough force on the hammer to keep it from bouncing excessively or “rising” off the bit. Too much force will cause slower drilling speeds, overheating and lower drilling rate.
4. Drill straight, keeping the bit at a right angle to the work. Do not exert side pressure on the bit when drilling as this will cause clogging of the bit flutes and a slower drilling speed.
5. When drilling deep holes, if the hammer speed starts to drop off, pull the bit partially out of the hole with tool still running to help clear debris from the hole.

NOTE: A smooth, even flow of dust from the hole indicates proper drilling rate.

MAINTENANCE

Your DEWALT power tool has been designed to operate over a long period of time with a minimum of maintenance. Continuous satisfactory operation depends upon proper tool care and regular cleaning.

WARNING: *To reduce the risk of serious personal injury, turn tool off and disconnect battery pack before making any adjustments or removing/installing attachments or accessories. An accidental start-up can cause injury.*

The charger and battery pack are not serviceable. There are no serviceable parts inside.

Lubrication

Your power tool requires no additional lubrication.

Cleaning

WARNING: *Blow dirt and dust out of the main housing with dry air as often as dirt is seen collecting in and around the air vents. Wear approved eye protection and approved dust mask when performing this procedure.*

WARNING: *Never use solvents or other harsh chemicals for cleaning the non-metallic parts of the tool. These chemicals may weaken the materials used in these parts. Use a cloth dampened only with water and mild soap. Never let any liquid get inside the tool; never immerse any part of the tool into a liquid.*

CHARGER CLEANING INSTRUCTIONS

WARNING: Shock hazard. Disconnect the charger from the AC outlet before cleaning. Dirt and grease may be removed from the exterior of the charger using a cloth or soft non-metallic brush. Do not use water or any cleaning solutions.

Rechargeable Battery Pack

This long life battery pack must be recharged when it fails to produce sufficient power on jobs which were easily done before. At the end of its technical life, discard it with due care for our environment:

- Run the battery pack down completely, then remove it from the tool.
- Li-Ion cells are recyclable. Take them to your dealer or a local recycling station. The collected battery packs will be recycled or disposed of properly.

Optional Accessories

WARNING: Since accessories, other than those offered by DEWALT, have not been tested with this product, use of such accessories with this tool could be hazardous. To reduce the risk of injury, only DEWALT recommended accessories should be used with this product.

Consult your dealer for further information on the appropriate accessories.

Protecting the Environment

Separate collection. This product must not be disposed of with normal household waste.

Should you find one day that your DEWALT product needs replacement, or if it is of no further use to you, do not dispose of it with household waste. Make this product available for separate collection.

Separate collection of used products and packaging allows materials to be recycled and used again. Re-use of recycled materials helps prevent environmental pollution and reduces the demand for raw materials.

扭矩调节轴环(图 1)

您的工具配备一个可调节的扭矩螺丝起子装置, 用于安装和取出各种形状和大小的紧固件, 而且在某些型号中还配备一个锤击装置, 用于砖石钻孔。轴环 (c) 的周围是编号和钻头符号, 在某些型号中, 还有冲击钻符号。这些编号用于设置离合器以提供扭矩范围。轴环上的编号越大, 扭矩越高, 并且可安装的紧固件也越大。若要选择任一编号, 请旋转轴环直到所需的编号与箭头对齐。

双速排挡(图 1)

电钻/起子/冲击钻的双速功能可换挡以获得更大的适用性。

1. 若要选择速度 1 (高扭矩设置), 请关闭工具并让它停止转动。将换挡器 (d) 尽量向前滑动 (滑向夹头)。
2. 若要选择速度 2 (低扭矩设置), 请关闭工具并让它停止转动。将换挡器尽量向后滑动 (远离夹头)。

注: 工具在运行时切勿换挡。在换挡之前, 务必等待电钻完全停止。如果无法换挡, 请确保双速换挡器已完全向前推动或完全向后推动。

工作灯(图 1)

工作灯 (e) 位于触发开关 (a) 正上方。工作灯将在按压触发开关时启动。松开触发开关后, 工作灯最长将延迟 20 秒。

注: 工作灯是用于照亮紧邻的工作表面, 不能当作手电筒使用。

无钥匙式夹头(图 7-9)

警告:请勿试图通过握住夹头前端和打开工具来拧紧钻头(或任何其他附件)。这可能会导致夹头损坏和人身伤害。更换附件时,始终锁定触发开关并断开工具的电源连接。

警告:启动工具之前应确保钻头安装稳固。松动的钻头可能会从工具脱落,从而可能导致人身伤害。

您的工具配备自紧式夹头(f),带有一个旋转套管,便于单手操作夹头。若要插入钻头或其他附件,请执行下列步骤。

1. 关闭工具并断开工具的电源连接。
2. 用一只手抓住夹头的黑色套管,用另一只手固定工具。逆时针旋转套管以接受所需的附件。
3. 将附件插入夹头约 19 毫米(3/4")处,然后用一只手顺时针旋转夹头,另一只手则握住工具,将附件拧紧。您的工具配备一个自动主轴锁装置。凭借此装置,您只需一只手即可打开和关闭夹头。

确保在拧紧夹头时用一只手握住夹头套管,用另一只手握住工具,以获得最大的紧密性。

若要松开附件,请重复上述步骤 1 和 2。

正确的手持方式(图 3)

警告:为降低严重的人身伤害风险,请务必使用正确的手持方式,如图所示。

警告:为降低严重的人身伤害风险,请务必紧握工具以防止意外事件。

正确的手持方式要求一只手握住电钻顶端(如图所示),另一只手则握住主手柄(i)。

螺丝起子操作(图 4)

1. 使用双速档位选择器选择所需的速度/扭矩范围以满足操作计划的速度和扭矩要求。
2. 将扭矩调节轴环(c)转至所需位置。编号越小,表示扭矩设置值越小;编号越大,表示扭矩设置值越大。
3. 将所需的紧固件附件插入任意钻头的夹头。
4. 在较小或隐蔽区域进行一些实际运行以确定夹头轴环的正确位置。
5. 务必先从较低的扭矩设置开始,然后再使用较高的扭矩设置以避免损坏工件或紧固件。

电钻操作(图 5)

警告:为降低严重的人身伤害风险,在进行任何调整或取出/安装附加装置或附件之前,请关闭工具并断开工具电源连接。

警告:为降低人身伤害风险,请始终牢固锚定或夹紧工件。如果在较薄材料上钻孔,请使用“垫板”以防止损坏材料。

1. 将轴环(c)转至电钻符号。
2. 使用换档器选择所需的速度/扭矩范围以满足操作计划的速度和扭矩要求。
3. 钻木材时,应使用麻花钻头、扁钻头、机械螺旋钻头或孔锯。钻金属时,应使用高速钢麻花钻头或孔锯。在金属上钻孔时,请使用切削润滑剂。但铸铁和黄铜材料例外,应干钻。
4. 用力方向始终与钻头成一直线。请施加足够大的压力,保证钻进所需,但不要大到马达失速或钻头倾斜。
5. 请双手紧握电钻,控制电钻的扭转效应。如果该型号不带侧手柄,请用一只手抓紧电钻手柄,另一只手则抓住电池组。

警示:如果过载,电钻可能会失速,从而导致突然扭转。务必预计是否会发生失速。紧握电钻以控制扭转效应,避免伤害。

6. 如果电钻失速,通常是由于过载或使用不当所致。**请立即松开触发开关**,从工件上退出钻头,查找失速的原因。**切勿试图通过按下、松开触发开关来启动失速的电钻 - 这会损坏电钻。**
7. 为尽量减少失速故障或避免钻头在材料中折断,请降低对电钻的压力,使钻头从孔的最后部分中缓和下来。
8. 从成孔中拉出钻头时,请保持马达运转。这有助于防止卡死。
9. 使用变速电钻时,无需中心冲定位。启动时采用较低速度,当钻深足以防止跳钻时,加力挤压触发开关,使电钻加速。

冲击钻操作(图 6)

DCD776

1. 将轴环 (c) 转至电钻符号。
 2. 向后滑动选择器(远离夹头),选择高速设置。
- 重要信息:**只使用碳化钻头或砖石钻头。
3. 钻孔时,只需对锤子施加足够的力,以防止过度反弹或“脱离”钻头。过多压力将导致钻孔速度变慢,过热,钻孔速度降低。
 4. 直线钻孔,保持钻头与工件成直角。钻孔时不要在钻头上施加侧压力,这将导致钻头凹槽堵塞和钻孔速度变慢。
 5. 钻深孔时,如果锤子速度开始减慢,在工具仍运行的情况下,从孔中拔出部分钻头以帮助清理钻屑。

注:如果钻屑平滑、均匀地流出,则表明钻孔速度适当。

维护

DEWALT 电动工具设计精良,可以长期使用,而且只需最少的维护。要连续获得令人满意的工作效果,需要进行合适的工具维护和定期清洁。

警告:为降低严重的人身伤害风险,在进行任何调整或取出/安装附加装置或附件之前,请关闭工具并断开电池组连接。意外启动可能会导致人身伤害。

充电器和电池组无法维修。这些组件内没有可以维修的部件。

润滑

本电动工具无需另行润滑。

清洁

警告:一旦通风口和周围积聚了可见的粉尘,请立即用干燥的空气吹走主机外壳内的粉尘和灰尘。执行此过程时,需戴上经认可的护目装备和防尘面具。

警告:切勿使用溶剂或其他刺激性化学制品来清洁工具的非金属部件。这些化学物质可能会削弱这些部件使用的材料。请用布蘸温和的肥皂水擦拭。切勿让任何液体渗入工具,切勿让工具的任何部分浸在液体中。

充电器清洁说明

警告:触电危险。清洁前,请将充电器从交流电源插座上拔下。可用布或非金属软刷清除充电器外部的污垢和油脂。请勿使用水或任何清洁剂。

可选附件

警告:由于非 DEWALT 供应的附件未经本产品匹配测试,将此类附件用于本工具可能会造成危险。为降低伤害风险,本产品只可使用 DEWALT 推荐的附件。

请向您的经销商咨询更多关于合适附件的信息。
