#### Intended use

Your Stanley impact drill has been designed for drilling in wood, metal and concrete. This tool is intended for consumer use only.

#### General Power tool Safety Warnings

**Warning!** Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

**Save all warnings and instructions for future reference.** The term "power tool" in all of the warnings listed below refers to your mains operated (corded) power tool or battery operated (cordless) power tool.

#### 1. Work area safety

- a. **Keep work area clean and well lit.** Cluttered or dark areas invite accidents.
- b. **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.
- c. **Keep children and bystanders away while operating a power tool.** Distractions can cause

you to lose control.

#### 2. Electrical safety

- a. **Power tool plugs must match the outlet.** Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
- b. **Avoid body contact with earthed or grounded surfaces such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.
- c. **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.
- d. **Do not abuse the cord.** Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
- e. **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.
- f. **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

#### 3. Personal safety

- a. **Stay alert, watch what you are doing and use common sense when operating a power tool.** Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
- b. **Use personal protective equipment. Always wear eye protection.** Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- c. **Prevent unintentional starting.** Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- d. **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in

personal injury.

- e. **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.
- f. **Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.
- g. **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.

#### 4. Power tool use and care

- a. **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.
- b. **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- c. **Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.
- d. **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.
- e. **Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tools operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.
- f. **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- g. **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

#### 5. Service

- a. **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.

### Additional Power Tool Safety Warnings

**Warning!** Additional safety warnings for drills and impact drills

#### Drill Safety Warnings

- ◆ **Wear ear protectors when impact drilling.** Exposure to noise can cause hearing loss.
- ◆ **Use auxiliary handle(s), if supplied with the tool.** Loss of control can cause personal injury.
- ◆ **Hold power tool by insulated gripping surfaces when performing an operation where the cutting accessory may contact hidden wiring or its own cord.** Cutting accessory contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.
- ◆ Use clamps or another practical way to secure and support the workpiece to a stable platform. Holding the work by hand or against your body leaves it unstable and may lead to loss of control.
- ◆ Before drilling into walls, floors or ceilings, check for the location of wiring and pipes.
- ◆ Avoid touching the tip of a drill bit just after drilling, as it may be hot.
- ◆ This tool is not intended for use by persons(including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance.
- ◆ The intended use is described in this instruction manual. The use of any accessory or attachment or performance of any operation with this tool other than those recommended in this instruction manual may present a risk of personal injury and/or damage to property.

#### Safety of others

- ◆ This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

- ◆ Children should be supervised to ensure that they do not play with the appliance.

## Residual risks

Additional residual risks may arise when using the tool which may not be included in the enclosed safety warnings. These risks can arise from misuse, prolonged use etc. Even with the application of the relevant safety regulations and the implementation of safety devices, certain residual risks can not be avoided. These include:

- ◆ Injuries caused by touching any rotating/moving parts.
- ◆ Injuries caused when changing any parts, blades or accessories.
- ◆ Injuries caused by prolonged use of a tool. When using any tool for prolonged periods ensure you take regular breaks.
- ◆ Impairment of hearing.

## Date code position (fig. A)

The date code (13) is printed on the housing of the tool, which also contains the year of manufacture.

For example: 2014 XX JN  
Year of manufacture

## Electrical safety

- Double insulation measures are taken in this power tool, so no grounding is needed. Please check whether the voltage of power supplied is consistent with the voltage on the nameplate or not.
- ◆ If the wire is damaged, it should be replaced by the manufacturer or a service center authorized by Black & Decker, to avoid danger.

## Using an extension cable

If an extension cable is required, use an approved extension cable suitable for the power input of this tool (see technical data). The minimum conductor size is 1.5 mm<sup>2</sup>.

## Assembly

**Warning!** Before assembly, please ensure that the

power tool is powered off and the power plug of the tool is unplugged from the power source.

#### Selecting the operating mode (fig. B)

The tool can be used in two operating modes:

-  **Rotary drilling:**  
for steel, wood and plastics.

-  **Impact drilling:**  
simultaneous rotating and impacting for concrete and masonry drilling operations.

- ◆ Select the required operating mode by rotating the mode selector (4) to the required position.

#### Inserting and removing a bit (fig. A)

Keyed chuck

- ◆ Open the chuck by turning the sleeve (9) counterclockwise and insert the bit shank.
- ◆ Put the chuck key (10) into each hole in the side of the chuck and turn clockwise until tight.
- ◆ To remove the bit, proceed in reverse order.

#### Fitting the side handle (fig. A)

The side handle (6) can be fitted to suit both RH- and LH-users.

-  Always use the drill with the side handle properly assembled.
- ◆ Loosen the side handle.
- ◆ For RH-users, slide the side handle clamp over the collar behind the chuck, handle at the left.
- ◆ For LH-users, slide the side handle clamp over the collar behind the chuck, handle at the right.
- ◆ Rotate the side handle to the desired position and tighten the handle.

#### Setting the drilling depth (fig. C)

- ◆ Insert the required drill bit into the chuck.
- ◆ Slacken the side handle (6).
- ◆ Fit the depth adjustment rod (7) through the hole in the side handle clamp.
- ◆ Adjust the drilling depth as shown.
- ◆ Tighten the side handle.

#### Forward/reverse slider (fig. A)

- ◆ To select forward or reverse rotation, use the forward/reverse-switch (3) (see arrow on tool).

-  Always wait until the motor has come to a complete standstill before changing the direction of rotation.

#### Chuck removal (fig. D)

- ◆ Open the chuck jaws as far as possible
- ◆ Insert a screwdriver into the chuck and remove the chuck retaining screw (12) by turning clockwise.
- ◆ Tighten an Allen key into the chuck and strike it with a hammer as shown.

#### Instructions for use

- ◆ Always observe the safety instructions and applicable regulations.
- ◆ Be aware of the location of pipework and wiring.
- ◆ Apply only a gentle pressure to the tool. Excessive force does not speed up drilling but decreases tool performance and may shorten tool life.
- ◆ Wear ear protectors with impact drills. Exposure to noise can cause hearing loss.
- ◆ Use auxiliary handles supplied with the tool. Loss of control can cause personal injury.
- ◆ Hold power tool by insulated gripping surfaces, when performing an operation where the cutting accessory may contact hidden wiring or its own cord. Cutting accessory contacting a "live" wire may make exposed metal parts of the power tool "live" and shock the operator.
- ◆ If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.

#### Prior to operation

- ◆ Insert the appropriate bit.
- ◆ Mark the spot where the hole is to be drilled.

#### Proper Hand Position (fig. A, E)

 **WARNING:** To reduce the risk of serious personal injury, **ALWAYS** use proper hand position as shown.

 **WARNING:** To reduce the risk of serious personal injury, **ALWAYS** hold securely in anticipation of a sudden reaction.

Proper hand position requires one hand on the side handle (6), with the other hand on the main handle.

#### Switching on and off

- ◆ To switch the tool on, press the variable speed switch (1). The tool speed depends on how far you press the switch.
- ◆ For continuous operation, press the lock-on but-

ton (2) and release the variable speed switch. This option is available only at full speed.

- ◆ To switch the tool off, release the variable speed switch. To switch the tool off when in continuous operation, press the variable speed switch once more and release it.
- ◆ Based on the different applications, turn around the speed dial (11) to control the maximum speed.

## Drilling in metal

Start drilling with slow speed and increase to full power while applying firm pressure on the tool. A smooth even flow of metal chips indicates the proper drilling rate. Use a cutting lubricant when drilling metals. The exceptions are cast iron and brass which should be drilled dry.

**NOTE:** Large [5/16" (8 mm) to 1/2" (13 mm)] holes in steel can be made easier if a pilot hole [5/32" (4 mm) to 3/16" (5 mm)] is drilled first.

## Drilling in wood

Start drilling with slow speed and increase to full power while applying firm pressure on the tool. Holes in wood can be made with the same twist drills used for metal. These bits may overheat unless pulled out frequently to clear chips from the flutes. Work that is apt to splinter should be backed up with a block of wood.

## Drilling in masonry

When drilling in masonry, use carbide-tipped bits rated for Impact drilling and be certain that the bits are sharp. Use a constant and firm force on the tool to drill most effectively. A smooth, even flow of dust indicates the proper drilling rate.

## Screwdriving

- ◆ Select forward or reverse rotation.

## Impact drilling (fig. A)

- ◆ Select the Impact mode.
- ◆ Press the switch (1).

## Rotary drilling (fig. A)

- ◆ Select the rotary drilling mode.
- ◆ Proceed as described for Impact drilling.

Consult your dealer for further information on the appropriate accessories.

### 正反转开关 (图A)

- ◆ 要选择正或反旋转，请使用正反转开关 (3) 如

工具上的箭头所示。

**切记要等到马达完全停止后，方可改变旋转方向。**

### 夹头的拆卸（图D）

- ◆ 将夹头按逆时针方向转到最大位置。
- ◆ 将螺丝刀伸入夹头，顺时针旋转，取出固定夹头的螺丝（12）。
- ◆ 用六角扳手的短端紧固到夹头内，用软锤按视图方向敲打手柄，直到夹头松开。

### 操作前

- ◆ 装入适当的钻头
- ◆ 在要钻孔的位置上做好标记

### 正确的手持方式（图A、E）

**警告！**为降低严重的人身伤害风险，请务必使用正确的手持方式，如图所示。

**警告！**为降低严重的人身伤害风险，请务必紧握工具以防止意外事件。  
◆ 正确的手持方式要求一只手握住侧手柄（6），另一只手则握住主手柄。

### 启动与关闭

- ◆ 要开启工具电源，请按下变速开关（1）。工具转速取决于您按下开关的程度。
- ◆ 要使工具连续运转，请按下锁定按钮（2），然后松开变速开关。此选项只在全速运作时可用。
- ◆ 要关闭工具电源，请松开变速开关。要在连续运转时关闭工具电源，请再次按下变速开关然后松开。
- ◆ 根据不同的应用情况，转动速度旋钮（11）控制最大速度。

### 在金属材料上钻孔

开始钻孔时，采用较低速度；对工具施加稳固压力时，请增至全功率。如果金属屑平滑、均匀地流出，则表明钻孔速度适当。在金属上钻孔时，请使用切削润滑剂。但铸铁和黄铜材料例外，应干钻。

注：在钢材上钻大孔[5/16"（8毫米）到1/2"（13毫米）]时，如果首先钻一个先导孔[5/32"（4毫米）到3/16"（5毫米）]，则会比较容易进行。

### 在木材上钻孔

开始钻孔时，采用较低速度；对工具施加稳固压力时，请增至全功率。木材钻孔可以使用和钢材钻孔一样的麻花钻头。这些钻头会过热，除非你不断拔出钻头来清理钻屑。易碎裂材料应垫上木块。

### 在砖石材料上钻孔

在砖石上钻孔时，请使用冲击钻孔专用的碳化钻头，并确保钻头保持尖锐。对工具施加恒定、稳固的力度可使钻孔操作获得最有效的结果。如果钻屑平滑、均匀地流出，则表明钻孔速度适当。

### 拧螺丝

- ◆ 选择正反转

### 冲击钻孔（图A）

- ◆ 选择“冲击钻”模式。
- ◆ 按下开关（1）。

### 电钻钻孔

- ◆ 选择“电钻孔”模式。
- ◆ 如冲击钻中所描述的方式一般进行钻孔

### 维护

本史丹利有线/无线设备/工具设计精良，可以长期使用，而且只需极少的维护。要持续获得令人满意的 work 效果，需要对工具进行适当的维护和定期清洁。

**警告！**对有线/无线电动工具进行任何维护工作之前，必须：

- ◆ 闭电源并拔下设备/工具插头。
- ◆ 如果设备/工具配有独立电池组，请关闭电源并从设备/工具上取下电池。
- ◆ 如果设备/工具配有一体式电池，请将电池电量耗尽后，然后再关闭电源。
- ◆ 清洁之前，先拔下充电器插头。您的充电器除了需要定期清洁外，不需要执行任何保养操作。
- ◆ 定期使用软刷或干布清洁设备/工具/充电器内的通风槽。
- ◆ 定期使用湿布清洁电动机外壳。请不要使用任何研磨性或基于溶剂的清洁剂。
- ◆ 定期打开夹头并轻敲以去除内部的任何粉尘（安装后）。

### 清洁

**警告！**一旦通风口和周围积聚了可见的粉尘，请立即用干燥的空气吹走主机外壳内的粉尘和灰尘。执行此过程时，需戴上经认可的护

**警告！**切勿使用溶剂或其他刺激性化学制品来清洁工具的非金属部件。这些化学物质可能会削弱这些部件使用的材料。请用布蘸温和的肥皂水擦拭。切勿让任何液体渗入工具，切勿让工具的任何部分浸在液体中。
